Mark inside each domain — its tier on the InterPro entry-type ladder: 1 = Domain/Repeat · 2 = Family/Homologous superfamily · 3 = member-DB hit (G3DSA/PTHR/SSF/cd/PF) · S = site/PTM, ranked with tier 2. FILLED = kept, and compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — a 2, S or 3 when more than half of it is already covered by a higher tier, and an entry of ANY tier when it duplicates a longer kept entry of the same accession that overlaps it.
