The diagram shows a protein structure with a missing domain. A horizontal line represents the protein backbone. On the right side, a segment of the backbone is highlighted in green, with the text "No domains" written below it. This indicates that the domain structure is incomplete or missing for that part of the protein.

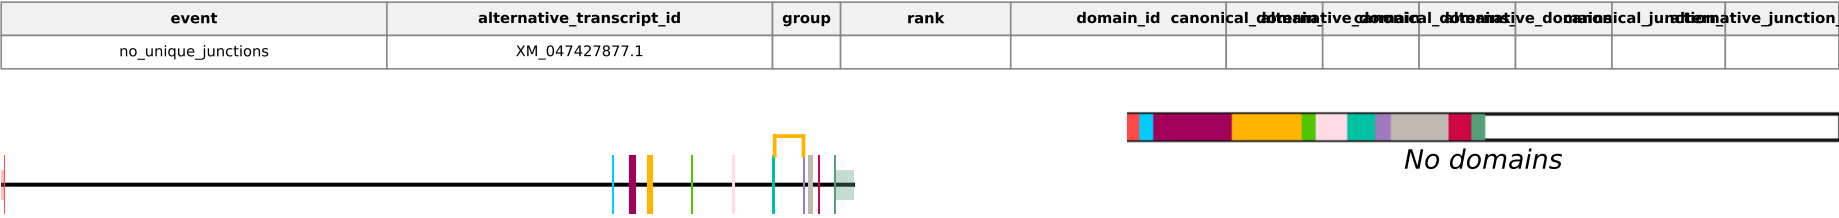

The figure displays a genomic track visualization. The top part shows a series of vertical bars of various colors (blue, orange, green, red, purple, yellow) representing different domains or features. Below this, a horizontal line represents the genomic axis. To the right of the line, a bar chart shows the distribution of domains, with a large grey bar labeled "No domains".
