The left number line shows the number of iterations. It has major ticks at 34,100,000, 34,000,000, 33,900,000, 33,800,000, 33,700,000, and 33,600,000. The right number line shows the number of nodes. It has major ticks at 800, 1600, 2400, and 3200.

The diagram shows a protein with a signal peptide (red) and a transmembrane domain (green). The signal peptide is located at the N-terminus and is followed by a cytosolic domain (blue). The transmembrane domain is located in the middle of the protein and is followed by an extracellular domain (yellow). The protein is shown in a cross-section of a lipid bilayer, with the signal peptide and transmembrane domain embedded in the membrane. The cytosolic domain is in the cytosol, and the extracellular domain is in the extracellular space. The text "No domains" is written below the extracellular domain.
