The diagram shows a protein structure with various domains and a 'No domains' label. The protein is represented by a horizontal line with several colored blocks indicating domains. From left to right, the domains are: a grey block, a light blue block, a green block, a purple block, a blue block, a red block, an orange block, a dark blue block, a light green block, and a dark green block. A bracket connects the green and purple blocks. To the right of the protein structure, there is a legend with colored squares corresponding to the domain colors. Below the legend, the text 'No domains' is written.

The diagram illustrates domain architectures for various proteins. The top section displays several protein models as horizontal black lines with colored vertical bars indicating domain positions. From left to right, these include:

- A single orange bar.
- Two orange bars.
- A sequence of overlapping colored bars: teal, purple, magenta, cyan, and maroon.
- A yellow bar followed by blue, green, and red bars.

The bottom section features a long horizontal bar labeled "No domains". Above this bar is a legend consisting of seven colored squares: teal, purple, magenta, cyan, yellow, green, and red.

The diagram shows a protein structure with a color key and a label. The color key consists of a horizontal bar with segments of different colors: grey, purple, cyan, magenta, yellow, blue, green, and orange. Below the bar, the text "No domains" is written. The protein structure is represented by a horizontal line with several vertical bars of different colors (grey, purple, cyan, magenta, yellow, blue, green, orange) indicating specific regions or domains. The structure is shown in a 3D perspective, with the vertical bars extending upwards and downwards from the horizontal line.
