Only InterPro Domain and Repeat entries are drawn, and only those are compared — so every domain the events table names appears here. Neither drawn nor compared: InterPro Family and Homologous\_superfamily entries, the residue features (active/binding/conserved site, PTM), and member-database signatures (G3DSA/PTHR/SSF/cd/PF), which are not curated structural units. FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

A horizontal number line with arrows at both ends. It has major tick marks labeled 49,060,000, 49,048,000, 49,036,000, and 49,024,000 from left to right. There are also minor tick marks between the major ones. Vertical dashed lines extend upwards from the tick marks for 49,054,000 and 49,042,000.
