Only InterPro Domain and Repeat entries are drawn, and only those are compared — so every domain the events table names appears here. Neither drawn nor compared: InterPro Family and Homologous_superfamily entries, the residue features (active/binding/conserved site, PTM), and member-database signatures (G3DSA/PTHR/SSF/cd/PF), which are not curated structural units. FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

The left number line has major tick marks at 37,960,000, 37,970,000, 37,980,000, and 37,990,000. Minor tick marks are placed halfway between these major values, representing increments of 10,000. The right number line has major tick marks at 100, 200, 300, 400, and 500. Minor tick marks are placed halfway between these major values, representing increments of 50.
