Transcript: ENST00000503088.1 | Protein: N/A [no protein]

Only InterPro Domain and Repeat entries are drawn, and only those are compared — so every domain the events table names appears here. Neither drawn nor compared: InterPro Family and Homologous_superfamily entries, the residue features (active/binding/conserved site, PTM), and member-database signatures (G3DSA/PTHR/SSF/cd/PF), which are not curated structural units. FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

Diagram illustrating a horizontal line with several vertical colored segments (green, red, purple, blue, grey) and a legend on the right labeled "No domains".

Transcript: ENST00000506003.5 | Protein: ENSP00000426919.1

The diagram shows a horizontal line with two vertical segments: a blue one on the left and a purple one on the right. To the right of the line is a legend box with a yellow and purple square and the text "No domains".

Only InterPro Domain and Repeat entries are drawn, and only those are compared — so every domain the events table names appears here. Neither drawn nor compared: InterPro Family and Homologous_superfamily entries, the residue features (active/binding/conserved site, PTM), and member-database signatures (G3DSA/PTHR/SSF/cd/PF), which are not curated structural units. FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

The diagram shows a protein structure with a color-coded domain map. The map is a horizontal bar with various colored segments. A label "No domains" is present below the map.
