Only InterPro Domain and Repeat entries are drawn, and only those are compared — so every domain the events table names appears here. Neither drawn nor compared: InterPro Family and Homologous_superfamily entries, the residue features (active/binding/conserved site, PTM), and member-database signatures (G3DSA/PTHR/SSF/cd/PF), which are not curated structural units. FILLED = compared. HOLLOW = removed before the comparison, so no row of the events table can refer to it — an entry that duplicates a longer kept entry of the same accession overlapping it.

A horizontal number line with major tick marks and labels at 30,840,000, 30,960,000, and 31,080,000. There are also minor tick marks between these major labels. Four points are marked with vertical dashed lines and labeled above the line: 30,780,000, 30,900,000, 31,020,000, and 31,140,000. The distance between 30,780,000 and 30,900,000 is labeled as 120,000. The distance between 30,900,000 and 31,020,000 is labeled as 120,000. The distance between 31,020,000 and 31,140,000 is labeled as 120,000. The total distance from 30,780,000 to 31,140,000 is labeled as 360,000.
