Transcript: ENST00000480987.5 | Protein: N/A [no protein]

Diagram illustrating a protein structure with a color scale. The structure is shown as a horizontal line with various colored segments (green, orange, blue, purple, yellow, green, grey) representing different domains or regions. A color scale bar is shown below the structure, with segments corresponding to the colors used in the protein model. The text "No domains" is written below the color scale bar.

A schematic diagram of a protein structure. A horizontal black line represents the protein backbone. A blue bracket is positioned above the line, spanning a specific region. Below the line, several vertical colored bars represent domains or regions: a pink bar on the left, a green bar under the first part of the blue bracket, a purple bar under the second part of the blue bracket, an orange bar, a blue bar, a green bar, and a light green bar on the right.
